

NOVUS v2 - Editorial Pipeline Fully Dressed Use Cases

Business Requirements (BR)

ID	Requirement
BR-01	The system must provide a dashboard accessible to Editors, Writers, and Graphics Designers to track their editorial tasks.
BR-02	The system must allow Editors to assign articles and graphics tasks to respective Writers and Graphics Designers.
BR-03	The system must allow Writers and Graphics Designers to submit their completed drafts into the pipeline.
BR-04	The system must allow Editors to validate submitted articles and drafts for final approval.
BR-05	The system must utilize an AI actor to automatically pre-screen articles during the validation phase (<<include>>).
BR-06	The system must allow the AI to trigger a revision request (<<extend>>) if the pre-screen detects quality issues.
BR-07	The system must allow Editors to manually override the AI pre-screening decision (<<extend>>).
BR-08	The system must allow all authenticated editorial team members to view the compiled bundle.
BR-09	The system must allow Editors to submit the finalized bundle for the next publication phase.

Use Case Full Descriptions

Use Case Name	View Dashboard
Use Case ID	UC-01
Author	Rei Khalil S. Galido
Purpose	To allow editorial team members to view their pending tasks, assignments, and pipeline status.
Requirement Traceability	BR-01
Priority	Medium
Preconditions	System Authentication is a mandatory precondition. The user is logged in as an Editor, Writer, or Graphics Designer.

Postconditions	The user views a personalized dashboard populated with relevant editorial data.
Actors	Editor, Writer, Graphics Designer
Flow of Actions	Basic Flow: 1. The user logs into the NOVUS v2 system. 2. The system loads the Editorial Pipeline dashboard. 3. The system fetches tasks specific to the authenticated user's role. 4. The user views their task list and current statuses. Alternative Flow: Database Unreachable: 1. The system fails to retrieve task data. 2. The dashboard displays a "Cannot load tasks at this time" error.

Use Case Name	Assign Articles
Use Case ID	UC-02
Author	Rei Khalil S. Galido
Purpose	To allow the Editor to allocate article topics and graphic requests to specific team members.
Requirement Traceability	BR-02
Priority	High
Preconditions	System Authentication is successful. The user holds the Editor role.
Postconditions	Tasks are officially assigned, and the respective Writers/Graphics Designers are notified.
Actors	Editor
Flow of Actions	Basic Flow: 1. The Editor navigates to the assignment module. 2. The Editor creates a new task (article or graphic). 3. The Editor selects a Writer or Graphics Designer from the active roster. 4. The Editor sets the deadline and submits. 5. The system updates the assigned user's dashboard.

Use Case Name	Submit Draft
Use Case ID	UC-03
Author	Rei Khalil S. Galido
Purpose	To allow creators to submit their finished

	textual or visual drafts into the pipeline for review.
Requirement Traceability	BR-03
Priority	High
Preconditions	System Authentication is successful. The user is a Writer or Graphics Designer with an active assignment.
Postconditions	The draft is uploaded to the system and marked as ready for validation.
Actors	Writer, Graphics Designer
Flow of Actions	Basic Flow: 1. The creator selects an active assignment from their dashboard. 2. The creator uploads their draft document or image file. 3. The creator clicks "Submit Draft". 4. The system updates the task status to "Pending Validation" and alerts the Editor.

Use Case Name	Validate Articles
Use Case ID	UC-04
Author	Rei Khalil S. Galido
Purpose	To allow Editors to review submitted drafts. This process mandates an AI pre-screening check.
Requirement Traceability	BR-04, BR-05, BR-06, BR-07
Priority	High
Preconditions	System Authentication is successful. A draft has been submitted. User is an Editor.
Postconditions	The article is either approved, rejected for revision, or pushed through via Editor override.
Actors	Editor
Flow of Actions	Basic Flow: 1. The Editor selects a submitted draft for review. 2. The system triggers the "Pre-Screen Article" inclusion (executed by AI). 3. The AI returns a positive validation score. 4. The Editor confirms the final approval of the draft. Alternative Flow 1 (Request Revision Extension): 1. The AI pre-screen detects plagiarism or poor formatting. 2. The system triggers "Request Revision",

	sending the draft back to the Writer. Alternative Flow 2 (Override AI Extension): 1. The AI flags the article, but the Editor deems the flag a false positive. 2. The Editor selects "Override AI". 3. The system approves the draft despite the AI warning.
--	--

Use Case Name	Submit Bundle
Use Case ID	UC-05
Author	Rei Khalil S. Galido
Purpose	To finalize the collection of validated articles and graphics for publishing.
Requirement Traceability	BR-08, BR-09
Priority	High
Preconditions	System Authentication is successful. The user is an Editor. All required drafts in the bundle are validated.
Postconditions	The bundle is locked and submitted to the Final Bundle Management pipeline.
Actors	Editor
Flow of Actions	Basic Flow: 1. The Editor navigates to the "View Bundle" screen to review the compiled issue. 2. The Editor verifies all contents are present. 3. The Editor clicks "Submit Bundle". 4. The system packages the content and transitions the bundle status to submitted.

Test Case Table

TC ID	UC ID	Test Case Name	Test Case Description
TC-01	UC-01	Verify Dashboard Access	Ensure all authenticated actors can view their specific dashboards.
TC-02	UC-02	Verify Article Assignment	Ensure an Editor can successfully assign a task to a Writer.
TC-03	UC-03	Verify Draft Submission	Ensure a Writer can upload and submit a document.

TC-04	UC-04	Verify AI Inclusion/Overrides	Ensure the Validate Article process triggers the AI Pre-screen and accepts Editor overrides.
TC-05	UC-05	Verify Bundle Submission	Ensure an Editor can compile and submit the finalized bundle.
