

Payment and Subscription Management Fully Dressed Use Cases

Business Requirements (BR)

ID	Requirement
BR-01	The system must allow Subscribers to manage their billing information.
BR-02	The system must allow Subscribers to select and subscribe to a subscription plan.
BR-03	The system must process payment and subscription renewals via an external Payment Gateway (<<extend>>).
BR-04	The system must automatically generate an invoice/receipt upon successful payment processing (<<include>>).
BR-05	The system must allow Subscribers and Admins to view current subscription statuses.
BR-06	The system must allow Subscribers to cancel their active subscription.

Note: System Authentication is a mandatory precondition for all actors and has been omitted from the visual diagram to preserve readability.

Use Case Full Descriptions

Use Case Name	Manage Billing Info
Use Case ID	UC-01
Author	Roman Rico Albania
Purpose	To allow Subscribers to add, update, or remove payment methods and billing addresses.
Requirement Traceability	BR-01
Priority	High
Preconditions	System Authentication is successful. User is logged in as a Subscriber.
Postconditions	The Subscriber's billing information is updated in the system records.
Actors	Subscriber
Flow of Actions	Basic Flow: 1. The Subscriber navigates to the Billing Management section. 2. The system displays current saved payment methods and billing addresses. 3. The Subscriber updates payment details or enters a new card/billing address. 4. The Subscriber saves changes. 5. The system validates and updates the billing profile. Alternative Flow: Invalid Card Details: 1. The system detects invalid billing inputs. 2. The system displays an "Invalid billing information" error and prompts the Subscriber to retry.

Use Case Name	Subscribe to Plan
Use Case ID	UC-02
Author	Roman Rico Albania
Purpose	To allow users to choose a subscription plan and process payment to unlock premium features.
Requirement Traceability	BR-02, BR-03, BR-04
Priority	High
Preconditions	System Authentication is successful. User is logged in as a Subscriber.
Postconditions	The Subscriber's account is upgraded, a payment transaction record is saved, and an invoice is generated.
Actors	Subscriber, Payment Gateway

Flow of Actions	Basic Flow: 1. The Subscriber selects a subscription plan from the pricing options. 2. The system triggers "Process Payment/Renewal" extension (executed by Payment Gateway). 3. The Payment Gateway approves the payment. 4. The system executes "Generate Invoice/Receipt" inclusion. 5. The system updates the user's status to active subscriber and sends confirmation. Alternative Flow 1 (Process Payment/Renewal Extension): 1. Payment fails or is declined by Payment Gateway. 2. System displays a payment error and cancels the subscription activation. Alternative Flow 2 (Generate Invoice/Receipt Inclusion): 1. Payment is successful. 2. System generates an automated PDF invoice and sends a copy to the Subscriber's email.
------------------------	---

Use Case Name	View Subscription Status
Use Case ID	UC-03
Author	Roman Rico Albania
Purpose	To allow Subscribers and Admins to inspect current plan tiers, renewal dates, and account standing.
Requirement Traceability	BR-05
Priority	Medium
Preconditions	System Authentication is successful. User is an active Subscriber or Admin.
Postconditions	Subscription parameters and payment history are displayed on screen.
Actors	Subscriber, Admin
Flow of Actions	Basic Flow: 1. The user opens the Subscription Status page. 2. The system retrieves active plan details, renewal date, and billing history. 3. The system renders current status metrics to the user.

Use Case Name	Cancel Subscription
Use Case ID	UC-04
Author	Roman Rico Albania
Purpose	To allow Subscribers to terminate recurring auto-renewals for their account.
Requirement Traceability	BR-06
Priority	Medium
Preconditions	System Authentication is successful. The Subscriber has an active paid plan.

Postconditions	Auto-renewal is disabled and account state is scheduled for expiration at end of billing cycle.
Actors	Subscriber
Flow of Actions	Basic Flow: 1. The Subscriber clicks "Cancel Subscription". 2. The system prompts for cancellation confirmation. 3. The Subscriber confirms. 4. The system disables auto-renewal and updates plan status.

Test Case Table

TC ID	UC ID	Test Case Name	Test Case Description
TC-01	UC-01	Verify Billing Info Update	Ensure a Subscriber can update card and billing address successfully.
TC-02	UC-02	Verify Subscription and Payment Flow	Ensure subscribing triggers payment processing and invoice generation.
TC-03	UC-03	Verify Status Visibility	Ensure both Subscriber and Admin can view accurate status details.
TC-04	UC-04	Verify Subscription Cancellation	Ensure Subscriber can disable auto-renew without immediate loss of access.

Requirements Traceability Matrix

Business Requirement ID	Use Case ID	Test Case ID
