

Minutes of Meeting: GitHub Workflow Implementation, Issue Tracking, and Course Planning

Date: August 3, 2026

Time: 10:20 AM – 10:51 AM

Location: Room 206

Presiding: Team

Attendees:

Joshmar Clavero, Joshua Concepcio, Rei Khalil Galido, Roman Rico Albania (Secretary)

1. Version Control & Repository Management

- **GitHub File Uploads:** The team established processes for uploading project files and managing documentation within the GitHub repository.
- **Issue Tracking Training:** The team reviewed and learned how to utilize GitHub Issues effectively to manage tasks, track bugs, and streamline project workflows.

2. Task Allocation & Course Planning

- **Documentation Issue Assignments:** GitHub Issues were assigned to specific team members to structure and delegate documentation deliverables.
- **MSYSADD1 Workload Planning:** The team planned and scheduled upcoming project workloads, align milestones, and balance tasks for the MSYSADD1 course.

Action Items & Deliverables

Task	Assigned To
Upload required documentation and project files to the GitHub repository	Team
Set up and assign GitHub Issues for remaining documentation tasks	Team
Finalize MSYSADD1 workload breakdown and assign individual task timelines	All Members
