

## Minutes of Meeting: Use Case Fully Dressed Specifications, Diagram Alignment, and Data Flow Mapping

**Date:** August 10, 2026

**Time:** 5:00 PM – 5:30 PM

**Location:** Online

**Presiding:** Mr. Carl Dominique Bueno (Adviser)

**Attendees:** Khalil Galido, Joshmar Clavero, Joshua Concepcion, Roman Rico Albania (Secretary)

### 1. Requirements Documentation & Fully Dressed Use Cases

- **Module Breakdown:** In the current use case diagram, modules must be created for each main use case, excluding <<extend>> and <<include>> relationships.
- **Level of Detail:** Fully dressed use case descriptions must be made highly granular and detailed.
- **Formatting & Naming Standardization:** The layout and format of the fully dressed use cases need to be cleaned up and standardized. Exact name consistency must be strictly maintained between the use case diagram labels and the fully dressed use case documents.
- **Document Deliverable Clean-up:** All embedded diagrams and images must be removed from the submission PDF for the fully dressed use cases.

### 2. Architecture & Data Flow Mapping

- **Data Flow Alignment:** Level 1 and Level 2 Data Flow Diagrams (DFDs) must directly mirror and be derived from the finalized use case diagram.

### Action Items & Deliverables

| Task                                                                       | Assigned To |
|----------------------------------------------------------------------------|-------------|
| Enhance and refine the overall Use Case Diagram                            | Team        |
| Create module breakdowns for main use cases (excluding include/extend)     | Team        |
| Write highly detailed fully dressed use cases matching exact diagram names | All Members |

| Task                                                                                                        | Assigned To |
|-------------------------------------------------------------------------------------------------------------|-------------|
| Clean up the formatting of fully dressed use cases and remove diagram images from the final PDF deliverable | Team        |
| Draft Level 1 and Level 2 DFDs based on the updated use case diagram                                        | Team        |
