

Minutes of Meeting: Manuscript Updates, Detailed User Story Specifications, and Use Case Diagram Refinement

Date: July 29, 2026

Time: 1:00 PM – 1:55 PM

Location: Online

Presiding: Mr. Carl Bueno

Attendees: Rico Albania, Joshmar Clavero, Khalil Galido, Joshua Concepcion

1. Manuscript & Research Documentation Updates

- **Chapter Content & Title Page:** Chapters 1 through 3 will carry over into the current paper, requiring updates only to the Title Page.
- **Author & Faculty Credits:** Team member names and faculty/professor names from MNTSDEV up to MSYADD1 must be inputted, explicitly listing Mr. Felino and Mr. Bueno as Co-Authors.

2. Backlog, User Story, and Acceptance Criteria Standards

- **Granular User Stories:** User stories must be significantly more detailed and highly specific, mapping actions out one screen at a time (e.g., logging in, selecting roles like writer/designer/reader). Drafts should be made as explicit as possible.
- **Persona Ownership:** Workload distribution for user story creation will assign exactly 1 persona to 1 team member.
- **Acceptance Criteria Standard:** The acceptance criteria for user stories must mandate confirmation feedback—such as a pop-up notification confirming successful actions—and specify post-action navigation (e.g., returning to the main page or remaining on the current screen).

3. Use Case Diagram & Description Refinement

- **Visual Clarity:** The use case diagram needs to be simplified and streamlined, incorporating distinct color-coding per persona to prevent visual confusion.
- **Use Case Rename Updates:**
 - *Submit Final Bundle* → **Manage Final Bundle**
 - *Publish to Website* → Moved under **Manage Editorial Pipeline**
 - *View Reports/Statistics* → **Manage Reports** (consolidating reports and statistics)
 - *Platform Control Plane* → **Manage Integration or Configuration**
 - *Manage User/Roles and Subscribers* → **Manage Users and Roles**
 - *Process Payment* → **Manage Payment**

- *Browse Featured Content* → **Browse Website**
- *Access Premium Content* → Extended to *Browse Website* and renamed **Manage Premium Contents**
- **Scope Reduction:** *Manage Analytics/Revenue* must be removed/hidden to reflect bare minimum requirements since the client has not explicitly requested it yet.
- **Fully Dressed Specs:** Once the use case diagram is finalized, the team will proceed with drafting fully dressed/full use case descriptions.

Action Items & Deliverables

Task	Assigned To
Update the manuscript Title Page and add Co-Authors (Mr. Felino and Mr. Bueno)	Team
Assign 1 persona per member and write screen-by-screen detailed user stories with success notifications in acceptance criteria	All Members
Simplify the Use Case Diagram and apply color coding per persona	Team
Apply all specific use case label renames and structural removals (Manage Final Bundle, Manage Reports, Manage Users and Roles, etc.)	Team
Draft fully dressed use case descriptions following the finalized diagram	Team
