

Minutes of Meeting: Project Alignment, Management Roadmap, and Core Strategy Review

Date: July 31, 2026

Time: 9:30AM – 9:57AM

Location: Online

Presiding: Team

Attendees: Joshmar Clavero, Joshua Concepcion, Rei Khalil Galido, Roman Rico Albania

1. Problem Definition & Strategic Objectives

- **Operational Bottlenecks:** The team defined the core problem as the heavy, manual workload carried by editors at BOSS Magazine PH, which leads to inefficiencies and tracking issues across submissions, revisions, approvals, and deadlines.
- **Monetization Gap:** It was highlighted that content produced by the client currently lacks monetization, leaving untapped revenue on the table.

2. Solution Architecture & Centralization

- **Centralized Workflow:** To address tool fragmentation across multiple apps, the proposed solution is to build a unified system ("Novus") centralizing writing, editing, and publishing operations in one platform.

3. Execution Plan & Agile Roadmap

- **Client & Academic Alignment:** The team validated the proposed solution through initial research, client presentation, and academic approval prior to initiating development.
- **Phased Deliverables & Check-ins:** System development is broken into manageable phases aligned with Midterm and Final deliverables, supported by weekly team and adviser progress check-ins.

4. Completion Criteria & Success Metrics

- **Validation Benchmarks:** Immediate completion markers include expert consultations, successful defense passes, and comprehensive mastery of system design.
- **Ultimate Success Metric:** Beyond academic completion, the ultimate success marker for the project is defined as the point when BOSS Magazine PH actively generates revenue through the platform.

5. Project Health & Status Update

- **Current Progress:** The project is on pace and aligned with schedule targets using an agile methodology.
- **Adviser Onboarding:** The team acknowledged the onboarding of a new adviser to help guide project execution moving forward.
